

Adestor Recyclable Packaging

MORE PAPER, LESS PLASTIC

Soft-wrap paper for ream-wrapped sheets

At Lecta, we are reaffirming our commitment to sustainability by moving towards developing innovative solutions that contribute to reducing our environmental impact and encouraging the circular economy. Protecting our products is just as important as protecting our environment.

New soft-wrap paper for Adestor ream-wrapped sheets

- 100% recyclable
- Totally plastic-free
- FSC® Certified

Adestor Recyclable Packaging

The new soft-wrap paper is 100% recyclable and meets EN:13430 standard on material recycling for containers and packaging.

With this gesture, we facilitate the recycling process of the soft-wrap paper thereby minimizing the environmental impact and reducing the associated waste management costs.

The polyethylene film layer is substituted by a functional protective barrier, resulting in a 100% plastic-free soft-wrap guaranteed to protect the product in optimum conditions if correctly stored.

With this we contribute to an annual reduction of 27 tons of consumed plastic and its equivalent* of 94.5 tons in CO₂ emissions.

The new soft-wrap paper is FSC® certified.

At Lecta, we have PEFC™ and FSC® Chain-of-Custody certifications. All of our wood and cellulose purchases are certified or controlled by these certifications, guaranteeing that our paper is manufactured with cellulose from responsibly managed forests.
